Profile

I am a highly motivated and enthusiastic fresher with a strong foundation in [computer science]. Known for my ability to quickly adapt and learn new concepts, I am eager to leverage my skills in a challenging and growth oriented environment

Education

2023/09 – present Vijayawada, India	**Masters Of Computer Applications** *KL UNIVERSITY*
2020/06 – 2023/05 Tadepalligudem,, India	**Bachelors Of Computer Science** *Akrg Degree College*

Skills

PYTHON   HTML,CSS

SQL

Projects

Hostel Rating Website

Problem: Students often struggle to find suitable hostels due to limited availability, varying quality, and high costs

- We gathered information about hostels, including location, price, facilities (e.g., Wi-Fi, meals, laundry), and photos.
- We collected and verified reviews from users who have stayed at these hostels.
- We added all these information in our website. It helps students to find hostel easily within their budget and saves their time
- We created website using HTML CSS and DJANGO framework.

Currency Converter

Problem : Ensuring that your currency converter uses the latest and most accurate exchange rates is crucial. Exchange rates fluctuate frequently due to market conditions, so you need a reliable source for real-time data.

- Choosing a dependable API or data source for exchange rates is important. Some popular options include Open Exchange Rates, CurrencyLayer, and XE. Each has different features, pricing, and reliability

- users from different regions may expect the interface to be localized in terms of language, currency symbols, and formatting.

Certificates

- Cloud Computing : By AWS

Declaration

I hereby declare that all the information mentioned above is truly best of my knowledge.
